

ZEPTO SALES PERFORMANCE ANALYSIS

Microsoft Excel Based Sales Analytics & Interactive

Tools:

Microsoft Excel | Pivot Tables | Pivot Charts | Slicers | Excel Formulas

Project Highlights:-

- **Total Sales : ₹5.64 L**
- **Avg Sales : ₹376.35**
- **Total Orders : 1498**
- **Total Customers : 300**
- **Total Products : 200**
- **Total Quantity : 4204**

Prepared By :-

Nilu Singh (Aspiring Data Science Trainee)

Project Date :- 2026

1. Introduction

The Zepto Sales Performance Analysis project is developed using Microsoft Excel to analyze sales performance, customer behavior, product/SKU performance, city-level trends, payment methods, customer types and delivery-related information. The project transforms transaction-level sales data into meaningful insights through Pivot Tables, Pivot Charts, Slicers, Excel formulas, and an interactive dashboard.

2. Objectives

- Measure overall sales, orders, customers, products, quantity, and average sales performance.
- Analyze sales performance across different customer types and customer segments.
- Compare sales across cities and payment methods.
- Identify monthly and daily sales and quantity patterns.
- Identify high-performing customers, orders, and SKUs.
- Build an interactive Excel dashboard that allows users to filter and explore the analysis.

3. Business Problems

- What is the total sales generated during the analyzed period?
- Which city contributes the highest sales?
- Which payment method contributes the highest sales and order volume?
- Which customer type contributes the highest sales and quantity?
- Which customer segment generates the highest sales?
- Which months and days show stronger sales performance?
- Which customers, orders, and SKUs are among the top contributors to sales?
- How can the business use these findings to improve sales, customer engagement, and inventory planning?

4. Dataset Information

Dataset :- Sample Zepto Sales Dataset

The Orders sheet contains 1,498 transaction records and 22 fields.

- Order ID
- Order Date
- Month / Days
- Customer Name
- Customer Type
- Customer Segment
- City
- Payment Method
- SKU / Product Name
- Category
- Qty
- Price
- Discount
- Subtotal / Tax
- Delivery Fee / Surge Fee
- Sales
- Delivery Status / Delivery Time

5. Excel Features Used

- Excel Tables
- Pivot Tables
- Pivot Charts
- Slicers
- SUM, COUNT and AVERAGE Functions
- UNIQUE-based counting for distinct products/customers where applicable

6. KPIs (Key Performance Indicators)

KPI	Result	Description
Total Sales	₹563,787.04	Total sales generated by the analyzed orders.
Total Orders	1,498	Number of transaction records/orders analyzed.
Total Customers	300	Number of unique customers represented.
Total Products	200	Number of unique products represented.
Total Quantity	4,204	Total units/quantity sold.
Average Sales	₹376.36	Average sales value per order.

7. Dashboard Components

Dashboard Component	Chart / Analysis Type
Top 10 Orders by Sales	Bar Chart
Top 10 Customers by Sales	Bar Chart
Top 10 SKU by Sales	Bar Chart
Sales over Month	Trend / Column Analysis
Sales over Days	Trend Analysis
Sales by Customer Segment	Comparison Chart
Sales by City	Column / Region Comparison
Sales by Payment Method	Comparison Chart
Customer Type Contribution to Quantity	Contribution Chart
Customer Type by City over Sales	Comparative Analysis
Customer Type by Payment Method	Order-count Comparison
Customer Segment by Delivery Status	Delivery-status Analysis

8. Slicers for Filtering Records

- Customer Type
- Customer Segment
- City
- Payment Method
- Delivery Status
- Month / Days

9. Dashboard Screenshot

Microsoft Excel ribbon showing tabs: Clipboard, Font, Alignment, Number, Styles, Cells, Editing, Add-ins. The Font tab is active, showing options for font face (Calibri), size (11), bold, italic, underline, text color, background color, and alignment (left, center, right, justified, merge & center). The Number tab shows options for number format (General), currency, percentage, decimal places, and thousands separator. The Styles tab shows options for conditional formatting, format as table, cell styles, and insert/delete/format cells. The Cells tab shows options for fill, sort & filter, and add-ins. The Editing tab shows options for clear, sort & filter, and add-ins.

10. Key Insights

- Total sales of ₹563,787.04 from 1,498 orders.
- 300 unique customers and 200 unique products.
- Bangalore generated the highest sales among the analyzed cities, indicating that it is an important market and could be prioritized for targeted sales and customer-retention initiatives. UPI has strong sales/order contribution.
- Bulk customers contribute significantly to sales and quantity.
- Office is the highest-performing customer segment.
- January has the highest quantity among the months shown.

11. Business Recommendations

- **Customer**
Focus retention strategies on high-value and bulk customers.
- **City**
Prioritize marketing and sales activities in high-performing cities.
- **Products**
Maintain sufficient inventory for high-performing SKUs.
- **Customer Segments**
Create targeted offers for high-performing customer segments.
- **Payment**
Continue supporting convenient digital payment methods.
- **Time**
Use monthly/daily patterns to improve inventory and campaign planning.
Your existing recommendations already follow this approach.

12. Project Limitations

- The analysis is limited to the available dataset and time period.
- There is no dedicated Profit field.
- Metrics must be interpreted according to the visualization.
The project doesn't include automated database/BI refresh workflows.

13. Conclusion

- The Zepto Sales Performance Analysis project demonstrates the use of Microsoft Excel to transform raw transaction data into meaningful business insights. Through data cleaning, KPI analysis, Pivot Tables, Pivot Charts, and interactive slicers, the project provides a consolidated view of sales, customers, products, cities, payment methods, and customer segments.
- The analysis can support business decisions related to customer engagement, inventory planning, sales performance, and targeted marketing.
